# EUROSTEEL MASTER 2015

## VII Edition

Advanced  
Training Course for the  
European Steel Sector  
11<sup>th</sup> to 15<sup>th</sup> May 2015  
*Terni, Italy*

*Organized by*

CENTRO SVILUPPO MATERIALI S.P.A. &  
EUROFER, INDUSTRIALL, FEDERACCIAI, ESTEP

*Supported by the*  
EUROPEAN COMMISSION

## AIMS

The EU steel industry has undergone a long period of crisis since 2008 with the consequent reduction of capacity and production. Restructuring is still experiencing a rapid evolution, both in terms of business and management structures as well as from a technological point of view too. Such developments have implications for the steel market as well as for the production cycle. In order to successfully manage these developments, the personnel needs to possess analytical and managerial skills, supported by a deep knowledge of the industry. They need to understand and address the technology-driven operations and organization changes taking place within their companies. This is essential to allow the middle management to be actively involved in the implementation of company's policies and contribute positively to on-going developments.

## TARGET GROUP

The 2015 Eurosteelmater is addressed to managers, technical staff, researchers, trade unionists and other professionals operating in the steel industry and in closely related areas.

Participants should possess a university degree or equivalent experience.

## ORGANIZERS/SUPPORTERS

The course is organized by CSM with the support of European Commission, EUROFER, industriAll, Federacciai, ESTEP – European Steel Technology Platform.
